100 YEARS OF SCOUTING
Celebrating the Adventure ★ Continuing the Journey

The Boy Scouts of America recommends that all youth and adult members have annual medical evaluations by a certified and licensed health-care provider. In an effort to provide better care to those who may become ill or injured and to provide youth members and adult leaders a better understanding of their own physical capabilities, the Boy Scouts of America has established minimum standards for providing medical information prior to participating in various activities. Those standards are offered below in one three-part medical form. Note that unit leaders must always protect the privacy of unit participants by protecting their medical information.

Parts A and C are to be completed annually **by all BSA unit members**. Both parts are required for all events that do not exceed 72 consecutive hours, where the level of activity is similar to that normally expended at home or at school, such as day camp, day hikes, swimming parties, or an overnight camp, and where medical care is readily available. Medical information required includes a current health history and list of medications. Part C also includes the parental informed consent and hold harmless/release agreement (with an area for notarization if required by your state) as well as a talent release statement. Adult unit leaders should review participants' health histories and become knowledgeable about the medical needs of the youth members in their unit. This form is to be filled out by participants and parents or guardians and kept on file

MEDICATION MUST BE LEFT IN CAMP OFFICE – EXCEPT FOR PERSONAL INHALER AND/OR EPI-PEN

Will Scout need medication at camp? YES NO
